Dear Friends,

A new year has just started for the Verde Valley and a new opportunity for our local high school students to participate as part of several robotics teams here in north central Arizona. Team #2406 (Cowdogs) hosted at South Verde High School serving the students of Camp Verde is once again competing in the Arizona Regional Robotics Competition in March. Robotics provides an excellent opportunity for students to learn about math, science, and technology through robotics competitions. A robotics team does more than just build robots. We help prepare students for life in this ever growing technical society. Students learn budgeting, logistics, web design, project planning, ethics, engineering, while competing in a made for TV tournament. Students also are eligible for over 9 million dollars in scholarships to help continue their education.

Our teams' annual budget is approximately \$12,000. We have been able to acquire grants and sponsorships for \$8,400 of that budget. This leaves \$3600 for the team to raise. We need your support by sponsoring our team. Donations of any amount are greatly appreciated. All sponsors will have their company name on our team banner, and sponsors that donate \$100 or more will have their company name on our uniforms and our robot. All donations are tax deductible, and all funds donated go directly to supporting the robotics team. Our team will be competing at one or more regional events and we would be proud to represent your company at our televised competitions.

Verde Valley Robotics, Inc. is a non-profit organization dedicated to promoting and developing technology education in the verde valley. We currently have two high school robotics teams and several Lego robotics teams in the middle schools. We are also working with NAU, Yavapai College, VACTE and the Verde Valley school districts to create and develop technology educational opportunities for our children.

Any assistance that you can provide would be appreciated.

Thank You,

Alan Minner,  
Education Director - Verde Valley Robotics, Inc.  
Coach – Team #2406
