Dear Sponsor,

A new school year has just started for the Verde Valley, and a new season for our robotics programs as well. One of these programs is the *FIRST* LEGO League. We currently have several teams in the Verde Valley for youth ages 9 to 14. This program provides an opportunity for local youth to learn about current events in a fun and educational environment. This year's challenge is "Power Puzzle"- learning to understand the elements of energy in today's world. If we are to have a successful program, we need your financial support. This tax deductible donation will make your company one of our primary sponsors with your company name or logo on our student's uniforms and banners as well as a sponsor link on our web site. Our teams compete at one or more regional events and we would be proud to represent your business at our competitions.

Verde Valley Robotics, Inc. is a 501(c)(3) non-profit charitable organization dedicated to promoting and developing technology education in the Verde Valley. We currently have two high school robotics team and several LEGO robotics teams in the community and middle schools this fall. We are also working with NAU, Yavapai College, and several Verde Valley school districts to create and develop technology educational opportunities for our children.

Any assistance that you can provide would be appreciated.

Thank You,

Alan Minner,  
Education Director - Verde Valley Robotics, Inc.
